

Zebra® Card Printers

SEE MORE. DO MORE.

In more than 90 countries, Zebra card printers produce over 1.5 million cards every business day. Card after card, Zebra printers deliver reliable performance and excellent print quality. You can count on Zebra's ZXP printers to produce clear, sharp and color-rich images when you need them, where you need them. Our printers are the most durable on the market, with great standard warranties and optional on-site hot swaps (U.S. only) to minimize downtime.

Easy to use and feature rich

All Zebra card printers offer intuitive user interfaces and color touch points, making them easy to use and reducing the amount of user training required. Choose from a broad range of printers offering full color and monochrome card printing. Options range from USB, wireless, or Ethernet connectivity, smart card and magnetic stripe encoding, and UHF Gen 2 RFID encoding, to lamination for higher security and card durability.

There is a Zebra card printer to meet all your business needs.

Zebra's High-performance, Professional and Standard card printers print directly to plastic cards using dye sublimation and/or thermal transfer technology. These printing methods offer edge-to-edge, high-quality card printing for a wide variety of uses. Select from models that are ideal for high- or lower-volume printing, with multiple security and encoding options to meet your specific needs.

Retransfer printing

Retransfer printers print onto a flexible, transparent film, and the image is then thermally bonded to the card. This print method is ideal for over-the-edge printing on uneven card surfaces, such as smart cards, or for when the application calls for very high image quality or cards that are more durable and abrasion resistant.

ZEBRA CARD PRINTER FAMILY

	High-security Retransfer	High-performance
	Advanced retransfer technology for the highest security applications.	A robust, photo-quality card printer that delivers maximum performance.
Models	ZXP Series 8™	ZXP Series 7™
Print Speed (CPH = Cards Per Hour)	Single-sided: Color: 190 CPH Double-sided: Color: 180 CPH	Single-sided: Color: 300 CPH Mono: 1,375 CPH Double-sided: Color: 225 CPH
Standard Features	<ul style="list-style-type: none"> • USB and Ethernet connectivity • Intelligent media technology • Over-the-edge retransfer printing • Two-year printer, lifetime printhead warranty • 150 card capacity feeder (30 mil. card thickness) 	<ul style="list-style-type: none"> • USB and Ethernet connectivity • Intelligent media technology • Edge-to-edge printing on standard CR-80 media • Print Touch™ NFC tag for online printer documentation and support videos • Two-year printer and printhead warranty • 200 card capacity feeder (30 mil. card thickness)
Optional Features	<ul style="list-style-type: none"> • Laminator – single-sided and dual-sided • 802.11b/g wireless connectivity • Magnetic stripe encoder • Smart card contact station • Combined MIFARE® and contact encoder • Lockable enclosure/card feeder 	<ul style="list-style-type: none"> • Laminator – single-sided and dual-sided • 802.11b/g wireless connectivity* • Magnetic stripe encoder • Smart card contact station • Combined MIFARE and contact encoder • UHF Gen 2 RFID Encoder* • Lockable enclosure/card feeder
Ideal For	<ul style="list-style-type: none"> • Employee ID and access control cards • Government-issued driver licensing • High-security ID and access control cards • Instant issuance bank cards • Personalized gift/loyalty cards • National ID and voter registration cards 	<ul style="list-style-type: none"> • Employee ID and access control cards • Government-issued driver licensing • High-security ID and access control cards • Personalized gift/loyalty cards • National ID and voter registration cards • Student ID cards • Event ticketing and access control • Service bureaus

GENUINE ZEBRA™ SUPPLIES AND SOFTWARE

Genuine Zebra products - supplies you can trust

Genuine Zebra supplies assure your ZXP printer produces outstanding images, text and barcodes – card after card.

Zebra's quality plastic cards enhance the print quality and image sharpness needed for vivid colors and detailed, readable barcodes. Zebra guarantees its pure PVC and composite PVC cards to be ISO compliant and dust-free with smooth edges.

All genuine Zebra supplies meet stringent quality standards and are recommended for optimal printing quality and proper printer performance. Zebra printers are designed to work only with Zebra True Colours® i Series and ix Series ribbons, and Zebra True Secure™ laminates and retransfer film.

Our easy-to-use smart Load-n-Go™ ribbons let you know when it is time to replace, so your downtime is minimized. Zebra's ribbons are also engineered to be eco-friendly with biodegradable additives and less plastic to reduce environmental impact.

Zebra software makes card printing easy

Zebra offers software that makes it easy to create and print cards. Our advanced network printer and print job management tools simplify integrating card printing and distributed printer deployments.

Whether you are a small business or a large enterprise, Zebra's CardStudio™ makes designing and printing professional-looking cards easy. For more information, visit www.zebra.com/cardstudio

Zebra Virtual PrintWare™ is designed to make it easy to issue cards from your own applications. The template-based printing capability allows for quick third-party application integration of card printing and card production flow. With Virtual PrintWare, you can print to one or more networked card printers, and remotely monitor printer health and status. To increase print capacity and throughput, you can also use the software to pool and manage multiple printers as if they were one printer.
