

DATACARD® TRUCREDENTIAL™ PROFESSIONAL SOFTWARE

TruCREDENTIAL™
SUITE

POWERFUL PLATFORM, MULTIPLE EDITIONS

The Datacard® TruCredential™ Suite offers an edition that's just right for you — whether you're just starting a credential issuance program or need to grow your current capabilities.

Basic, secure ID card issuance

- *TruCredential Express software:* Basic photo capture and data import, credential designer, and drag-and-drop workflows for a single-user environment.
- *TruCredential Plus software:* Signature capture, DSLR camera support, report capabilities, composite field support and SQL server support.

High-assurance credential issuance

- *TruCredential Professional software:* Smart card support, decentralized data capture, centralized data management, Microsoft Active Directory integration support, Oracle database support and document scan capture support.
- *TruCredential Enterprise software:* Additional PACS and access control system integration support, PeopleSoft HR system integration support and higher scalability up to hundreds of user stations.

Issue Smart Cards and Other High-Assurance Credentials with Ease

When you need to issue credentials with higher levels of security, Datacard® TruCredential™ Professional software provides a next-generation solution. This modern, intuitive, web-based platform provides the core software tools needed to design, print and manage IDs and credentials. Issue more sophisticated credentials including smart cards, with pre-built support for configuring smart card personalization options via the user interface, which you can also use to capture data and personalize smart cards.

Proven, feature-rich platform. This browser-based credential software integrates the best of our global software lines into one platform. Capable of supporting more users and multiple workstations, this software offers pre-built credential design templates, pre-built workflow templates, drag-and-drop workflows, plus document scan and signature capture device support. It also integrates seamlessly with Active Directory and Oracle, making it easy to populate card data and manage records.

Secure data management. Centrally manage credential designs, workflow templates and printer configurations while still allowing data capture from distributed locations. A central administrator can easily manage distributed user access and permissions while allowing for an audit trail.

Investment protection. If your needs grow, you can easily scale up to the most high-assurance edition of TruCredential Suite — our Enterprise edition that accommodates hundreds of users and retains the features and functionality you currently know and use.
