<sup>1</sup> The Printed tag number is placed on the back of the tag.

<sup>2</sup> For new artwork files, contact Customer Service for custom artwork number, lead-times, minimum order quantities, and cost.

<sup>3</sup> The iCLASS Tag is not for use on cards that use full insertion or tractor feed type readers.

<sup>4</sup> Please note that cards shipped out of Austin, Texas are always laser-engraved. Inkjetted option is not available for these cards.

Do not adhere to metal surfaces. Metal shields the RF, making the tag inoperable. Due to variations in cards and reading devices, HID does not claim that the iCLASS Tag will work in every situation. Functional and non-functional iCLASS Tags are available for compatibility testing with existing credential and reader technologies. Compatibility should be confirmed prior to ordering.
