Zebra
Professional Services

Need a thermal printer that will integrate seamlessly into your business environment? Zebra Professional Services can provide the right solution to suit your application. We offer services that simplify and support seamless integration of a Zebra® printer into your business environment.

Development Services

Increase throughput and simplify printer integration and operation by engaging our experts to customize your Zebra printer or create software solutions.

Printer Customization

- Customized Hardware, Electrical and Firmware Features allow modification of the printer's:
  » Appearance or functionality.
  » Power cords to circuit boards.
  » Front panel display, user menus, communications and print output.

Enterprise Printing Services

- Quickly implement and deploy cost-effective labeling and compliance solutions.

Software Solutions

- Software Development Kits enable integration of your smartphone and Windows®-based applications with your Zebra printer.

- Driver Customization enables you to:
  » Minimize user interaction.
  » Simplify a large-scale rollout.
  » Print unusual paper sizes, OEM brand logos and names.

- Alternative Programming Language allows drop-in replacement of competitive printers with Zebra printers.

- Zebra Basic Interpreter (ZBI™) Development—A custom software application that:
  » Converts non-ZPL data streams into printed labels, allowing you to replace old, non-Zebra printers.
  » Simplifies the use of the control panel commands.
  » Takes input from scales, scanners or other peripherals without a PC or network connection.

- Rapid Deployment
  Ensure quick and simple setup of your Zebra printer out-of-the-box. We can custom-configure your Zebra bar code printer's standard settings to meet the exact needs of your application. This ensures that your printer is ready to print when it arrives, and allows for a seamless integration within your environment. All you have to do is turn it on!

- Custom Software Applications including:
  » Global firmware upgrade utility.
  » Routing of print jobs to ensure 24/7 printing.

Implementation and Deployment

- Font Kit Creation allows you to print your unique font.

- Wireless Mark-up Language (WML)
  » Simplify printer operations by displaying custom printer menu screens.

- Mirror
  » Configure printers to automatically acquire updates from a central location.

Field Services
